## **DETAILED ACTION**

### ***Double Patenting***

1. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321© may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

2. Claims 1-20 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-18 of U.S. Patent No. 6,079,140. Although the conflicting claims are not identical, they are not patentably distinct from each other because they are obvious in view of the previously patented claims since the same structural elements are recited.

### ***Claim Rejections - 35 USC § 102***

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

Art Unit: 3643

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371© of this title before the invention thereof by the applicant for patent.

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 1-3, 9-11, 15-18 are rejected under 35 U.S.C. 102(e) as being anticipated by Capps.

The patent to Capps shows a plurality of floating decoys 10 on a body of water to support a frame 12, 14, 18 disposed beneath the decoys. The frame includes a motor 22 adapted to move the frame to cause the decoy to simulate movement which is part of feeding to attract other quarry. Capps shows a guideline 16 to secure the frame to the decoy.

5. Claims 1-3, 9-11, 15-18 are rejected under 35 U.S.C. 102(b) as being anticipated by O'Neil.

The patent to O'Neil shows a plurality of floating decoys 1, 35, 36, a frame 22 and a motor 9. The claims do not require that the motor is beneath the surface of the water since the open ended term "comprising" is used.

***Allowable Subject Matter***

6. Claims 4-8, 12-14, 19-20 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims and if the Double Patenting rejection is overcome.

Art Unit: 3643

***Conclusion***

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The patents to McBride and Bowling show other decoy systems.
